

LTS 14

Flexible cap press

THE ORIGINAL
FROM MILAN
SINCE 1972

The hand-operated LTS 14 is a special cap press that extremely convenient and easy to operate. The caps can be quickly and easily mounted, clamped, and printed.

During the transfer process, the smooth-running pressure arm automatically locks into place, so you don't have to hold it down continuously. The pressure can be continually adjusted by hand. To release the pressure arm, simply lift it approximately 2 cm. The built-in spring mechanism will then hoist the heating plate automatically.

No strength is required to raise it.

The clearly arranged digital display allows you to conveniently set and control transfer time and operating temperature. High-quality heating technology provides quick warmup. Even and constant operating temperature is guaranteed as well as extended durability of the heating elements.

The digital temperature control includes both audio and clear visual signals to indicate release time – making your work even easier.

LTS 14 allows adjustment of the pressure shoe by moving the support plate back and forth. This makes it possible to compensate for different forehead heights of caps and ensure perfect positioning of the upper heating plate onto the bottom support plate.

TECHNICAL DATA

Model	LTS 14
Transfer area	14.5 x 9 cm
Digital timer	0–999 sec
Temperature	0–250 °C
Watt	250 W
Power	220–240 V
Weight	18 kg
