

# LTS 238 · LTS 250

Manual nonstop press for fast work processes

THE ORIGINAL  
FROM MILAN  
SINCE 1972

These two models are among the best high-performance manual heat transfer presses. Its double support plate allows you to work fast. While one textile is being printed you can already prepare the next one on the other plate.

Thanks to its modular design, only a single press is required to print shirts, jackets, bags, lanyard keychains, and even caps: a variety of support plates can be quickly and conveniently interchanged.

The freestanding support plate of each press allows you to mount textiles easily in a single layer; only the fabric segment to be printed rests on the support plate. Prints previously applied to the textile remain unaffected, and creases impairing the printing result (usually caused by two layers) are easily avoided.

## TECHNICAL DATA

Model	LTS 238	LTS 250
Transfer area	[2x] 38 x 45 cm	[2x] 40 x 50 cm
Digital timer	0-999 sec	0-999 sec
Temperature	0-250 °C	0-250 °C
Heating output	2000 W	2000 W
Voltage	220-240 V	220-240 V
Weight	75 kg	75 kg

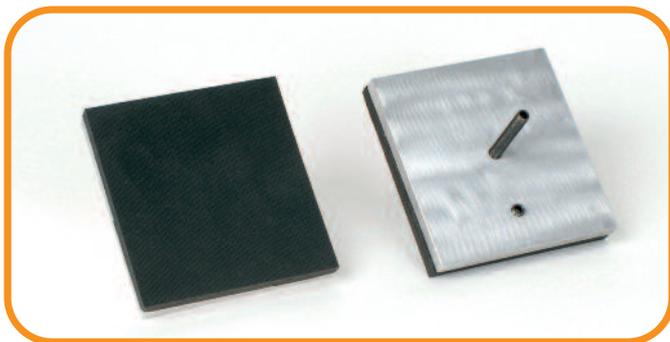

With **swivel presses**, the heating plate can be swiveled to one side, so that the support plate is no longer covered by it. This simplifies your work process in two respects: first, mounting the textile is even more convenient, and secondly, you have a clear view of the entire textile, allowing easy positioning of the transfer.

The **clearly arranged digital display** allows you to conveniently set and control transfer time and operating temperature. High-quality heating technology provides quick warmup. Even and constant operating temperature is guaranteed as well as extended durability of the heating elements.

### Optional accessories

In addition to the original support plate, **support plates in other sizes** are also available. Popular sizes include **breast pocket format** (Fig. 2) , the **oblong format** for transferring onto sleeves and trouser legs (Fig. 3), and the **rectangular format** for girlie t-shirts (Fig. 3) as well as a **format for umbrellas** (Fig. 3).

We can also produce any customized dimensions to fulfill your requirements.

All **cap sets** (Fig. 1) allow adjustment of the pressure shoe by moving support plate back and forth. This indispensable feature makes it possible to compensate for different forehead heights of caps: adjustment of the shoe allows optimum positioning under the bent heating plate.
