Dae Ha UK

VIEW OUR WEBSITE FOR REGULAR PRODUCT UPDATES

Dae Ha Korea is
a leading global
manufacturer of
Premium Quality
Heat Transfer Vinyl
& DTF Film with
exports to over
110 countries.

At the forefront of HTV & Film Coating technology since 1986, Dae Ha supplies the largest HTV distributors and competing manufacturers who re-brand our products, together with major fashion and sportswear clothing manufacturers, across six continents.

With an unrivalled quality to price ratio, Dae Ha UK supplies the UK's widest range of own brand HTV, Sublimation HTV & DTF Films, currently standing at over 500 unique colours and patterns available. With continual investment in Garment Film Research and Development, new and innovative products are regularly brought on stream, while we expand colours and patterns in current ranges frequently too.

With on average two new customers every day, enjoying the benefits that buying from Dae Ha UK brings, ranging from home crafters to French fashion houses, and from high street printers to the high-street chains, we're proud to put our own name on every order we deliver.

Working Towards Greater Sustainability

We're very proud to introduce a world first in our industry, Recycled Blended Polyester into all our Heat Transfer Vinyl PET Liners & DTF Film, supported by certification from Control Union. Investment will continue as we strive for breakthrough technology that allows us to become the first manufacturer to produce 100% sustainable and or recyclable HTV.

Our production facilities hold the internationally acclaimed ISO 14001:2015 Environmental Management System, and in the UK, we use only 100% recyclable and or biodegradable packaging, or re-purposed packaging we receive from our factory. Product certification includes SGS, EN71-3, REACH, CPSIA & Vegan Friendly too.

Dae Ha UK has eliminated all internal non-recyclable waste being sent to landfill by using an "Energy from Waste" facility, which turns what would otherwise be landfill waste into electricity for homes.

One Flex is Dae Ha's answer to one vinyl to suit all your needs. With the ability to cut fine detail, while remaining extremely easy to weed with a smooth release and clearly visible cut lines, gone are the days of buying three different films for three different jobs. DH One Flex is a hot peel film that will apply to garments in just 5 seconds, or with a temperature as low as 120C for those heat sensitive garments.

Information

- Perfect for t-shirts, sweatshirts, hi-viz garments, caps, bags etc.
- A clear, light adhesive backing enables intricate cutting and registration.
- Easy to see cut lines.
- Can be multi-layered.
- Can be washed up to 60°C standard and tumble dried on a low setting and ironed inside out.
- Suitable for cotton, polyester, mixtures of polyester/ cotton and polyester/acrylic or similar textiles.

Our magical easy to create 3D Puff PU. Starting as a thin PU film, it expands under a single press to turn your original text / design 3D.

Information

- A soft 3D Puff PU film, perfect for fashion, party and leisure wear.
- A clear, light adhesive backing enables fine cutting design and aides' registration.
- Easy to cut and weed.
- Puff PU is best suited to smaller designs and may not puff correctly if too large. We recommend keeping solid square /rectangular blocks below 40mm. Heat Press testing prior to use is strongly recommended, as puffing results may vary depending on the heat press conditions. Hot peel immediately, and remove from the platen while giving the garment a shake.
- Can be washed up to 40°C standard. Can be ironed inside out on a low setting. Not suitable for tumble dry.
- Suitable for cotton, polyester, mixtures of polyester/ cotton and polyester/acrylic or similar textiles.

Pressing Guidelines

SubliClear

With an incredibly soft and near invisible finish, SubliClear will allow you to Sublimate onto 100% white cotton garments (also suitable for other fabrics), like never before. With a finished design looking and feeling as close to screen print / DTG as you're likely to achieve with an HTV. The world of Sublimation has just been expanded.

NEW

Introducing **Dae Ha DTF Film**, using our advanced coating technology and attention to detail, we bring you the highest quality DTF Films on the market. Our film has undergone an extensive 12 Month development program run by coating experts, meaning we can ensure a consistent & stable quality, roll after roll after roll. Using our DTF films will ensure a successful transfer and vivid colour printing.

So, what makes our films so great?

- A genuine 100% **INSTANT HOT PEEL** film which works on every design. You can also **WARM** or **COLD PEEL**, if this works better with your production methods.
- There is no shrinkage of your image design after the printing process.
- No residue left on the surface of transfers or garment after heat pressing.
- Save money on ink costs, hotmelt powder and energy with our efficient and consistent coating technology.
- A Lower (75C) oven temperature is possible.
- The only DTF Film produced with Recycled Blended Polyester.
OEKO-TEX STANDARD 100
- Clean printing of small designs and letters.
- Dae Ha ISO 14001 Environmental & ISO 9001 Quality Certification.

See our website for more information. If you require a special roll size for DTF Film, please contact us.

Power Weeder

Vinyl Lift Off Remover

AlbaChem Vinyl Letter Removing Solvent completely removes vinyl letters / designs, Tagless labels and residues from most fabrics.

How to use VLR

- Apply from the backside of the transfer, using a finger on top of the transfer to aide location.
- Apply small drops of VLR to the back of the transfer. For very small detail, apply using a cotton bud or similar.
- Allow the VLR to soak in (do not rush), then lightly stretch the fabric to release the hot melt bond from the fabric.
- Peel away the transfer from the front side, using a palette knife (or similar) or your finger nail.
- If residue is showing when starting to peel a letter, wait approx. 5 more seconds.
- If any hot melt residue remains, or staining occurs, apply VLR to a clean (preferably white) cloth and rub until removed. Repeat the process if necessary.
- Always perform a test in a discreet area first.
- Some HTV will take longer to remove, than others, this is dependant on the base film construction. We strongly recommend you test VLR before use. Do not use on acetate fabrics.

VLR06

1+
£13.45

VLR20

1+
£21.95

Information

- Most powerful adhesive and residue remover.
- VLR does not contain Methelyne Chloride (Dichloromethane) or Carcinogens, as per most other vinyl removers.
- The Yorker spout allows for easy application minimising waste.
- Vinyl Letter Remover saves you time and money by dramatically reducing "seconds".
- Highly effective fast drying and odourless once dry.
- Approved by global brands.

Easily replace mistakes with VLR

Lotus Presses

Designed for Life...

About Lotus

With customers such as Prada, Adidas, Dolce Gabbana, Reebok, YSL & Puma, Lotus Press can stand shoulder to shoulder amongst these global heavyweights.

Hand built in Italy since 1972, Lotus presses use high grade European sourced materials, electronics and wiring to ensure their longevity that surpasses all others, and with a UK/EU directive for sustainable electrical items / “right to repair” law, which came into effect last summer, it puts decorator equipment and especially heat presses, in the spot light for greater sustainability, and where Lotus has you covered.

Leading Europe in its industry, Lotus presses are available in manual, semi-automatic or pneumatic versions, and custom presses and unique features are a speciality. The unique Mika-Tech smart heating technology provides the most accurate and even heating of the platen on the market, and all presses are ergonomically friendly and effortless to use day in day out, no matter how hard they're worked. Lotus presses are extremely durable, reliable, robust and sustainable.

Lotus and Dae Ha continue their Heat Press promotion, whereby you'll receive an eWallet credit on the Dae Ha website that you can spend against multiple orders for the HTV they manufacture. Worth 20%* of the value of the press you purchase, with no time limit on the eWallet *Total order value(s) including VAT and any applicable delivery charges.

Heat Press Accessories

Various standard heat press support plates are available to suit all your needs from kids garments, breast pockets, sleeves, ladies t-shirts and many more. Lotus can also make custom sizes if you have a specific requirement.
